Web Back end: Node, Express, MongoDB, PgAdmin 4

Version Control: Git/ Github

Languages

English - Native

Spanish - Native

Education

UNLV Boot camp completed Aug 2022

Portfolio

CROSSWORD PUZZLE

- First big project (for me) was to create a game only using what we have learned up to this milestone.
- Those skills were an intro to Javascript, HTML and CSS.

MOCK DELIVERY SERVICE APP

- This was a group project. My part was to create the routes and help set up the database with another student using MongoDB.
- We created a de-coupled app
- Please use the link to my portfolio to view my other projects.

Work

I am currently working for (Apex Materials) a trucking company in Las Vegas delivering aggregate. Do not let my current job fool you. I am a nerd at heart.
